SUMMARY	Passionate Application Developer with expertise in frontend and backend technologies, specializing in Flutter. Skilled in building high-performing, intuitive applications and solving complex problems. Strong communication skills enable me to convey technical concepts effectively. Continuously learning and adapting to new technologies to drive innovation and enhance my experiences.	
SKILLS	Technical Skills • Front-End Development : Dart,Flutter	• Back-end Development : Node.js,Express.js • Database Management : MySQL
PROJECTS	Tution App • Developed Tution App UI with three user modules: Admin, Tutor, and Student, using Provider architecture. • Enabled students and tutors to easily track attendance, class schedules, and batch details; helped tutors manage students efficiently and assisted admins in overseeing tutors and students. • Followed MVC architecture and built a responsive UI using Flutter for a live project, ensuring clean code structure and real-time usability. Book Management App • Developed Book Management App for efficient book collection management. • Built with MVC architecture for scalability. • Implemented CRUD operations and search functionality. Layali Brand App UI • Designed a luxurious UI for Layali Fragrance, blending elegance with functionality. • Crafted in a sophisticated black, gold, and silver theme for a premium feel. • Showcases product details, fragrance notes, and a seamless buy button. To-Do App • Designed To-Do App UI for efficiency and simplicity. • Minimalist layout with priority-based colors. • Responsive design for seamless task management. Profile App • Designed Profile App UI for simplicity and efficiency. • Clean layout with photo, name, place, and phone number. • Smooth interface for easy profile management.
